CALIFORNIA AIR TOOLS 365VK 5-GALLON PRESSURE POT VACUUM KIT

-- INSTALLATION INSTRUCTIONS --

STEP 1. Apply Teflon tape to Pressure Regulator/Valve Assembly male threads (1/4" NPT) – not supplied.

STEP 2. Install Pressure Regulator/Valve Assembly into threaded port at center of Acrylic lid. Gently turn Reg/Valve assembly fully clockwise until tight and fully secure. Refer to photos below.

STEP 3. Place the Sealing Ring (U channel) onto the edge of the 5-gallon pressure pot. Push sealing ring down into place to secure. Refer to photo below.

STEP 4. Place Regulator/Acrylic lid assembly onto top of 5-gallon pot; tighten and secure all four (4) rod assemblies. Ensure the surface area of the acrylic lid is centered and flush to the top of the pressure pot.

NOTE: Pressure Regulator/Valve Assembly has two (2) ¼" NPT threaded connections which may be connected to vacuum pump air lines, or similar. Close respective ball valve lever if not being actively used.
